Nevada City Nugget

VOLUME VI NUMBER 12 THE GOLD CENTER THE NEVADA CITY NUGGET, CALIFORNIA THE COUNTY SEAT PAPER FRIDAY, JAN. 29, 1932

GORDON HADLEY TELLS OF HIS WORLD TOUR

The following clipping is from a Humboldt County paper and tells of a long sea voyage of young Gordon Hadley, son of Mrs. Hildegarde Hadley, the latter a former Downieville girl:

"Gordon Hadley, son of Mrs. Hildegarde Hadley, of Arcata, returned on Tuesday after several months of traveling about the world on the two Dollar line boats, the President Johnson and the President Monroe. Hadley worked in the engine room during these trips, and expressed himself as satisfied to settle down for a time after the completion of this last trip. He expects to enroll at Humboldt State Teachers College where he will be a welcome addition to the Green and Gold basketball squad.

Hadley's itching feet caused him to leave school last spring for another trip to sea. He secured a job on the President Johnson, while the boat was in San Francisco, and then set sail for New York by way of the Panama Canal. Returning to the West Coast after touching at Havana he sailed for the Hawaiian Islands and Yokoma. The ship continued through the Inland Sea to Kobe, across the Yellow Sea to Shanghi, and then down to Manila. Crossing the China Sea to Hong Kong and then back to Japan and San Francisco completed what is known as "the horseshoe trip" to the Orient.

The Arcata boy tells interesting tales of his experiences with 'rickshaw men and the unrest in the Far East. One night he went to a Japanese restaurant, Nagasgi Joe's for dinner. Obtaining a good meal, he decided to return the next evening, but found it completely demolished. The Chinese were driving the Japanese out of their cities as rapidly as they could. Foreigners of other nationalities were also in danger, according to the stories he heard. Gangs of Chinamen preyed upon shopkeepers who were watched when they closed their establishments ,and were relieved of their money.

Back they sailed across the Pacific through the Canal once more, and on to New York, where the boat went into dry dock. Here Hadley had a chance to go on the new ship, the President Hoover, but because of a friend on the President Monroe, he decided to ship on that boat for a round-the-world cruise. This friend was William Quigg, of Eureka, son of Policeman John Quigg. He is an assistant engineer on the ship. Quigg arranged for his transfer to Hadley's watch, and helped him to learn the engine room work.

The Dollar boats all travel west, and so Hadley was off for the Canal by way of Havana. He was favorably impressed with this tropical city and enjoyed visiting it, though trouble with negro guides was not pleasant.

Work was still going on at this time in clearing the large slide that had moved into Culebra Cut. Westward again to San Francisco, they followed the same route to the Orient, stopping at Honolulu enroute. While in Hong Kong, the Hadley boy was impressed again with the beauty of the lights of the city of Victoria on Hong Kong Island and the panorama which unfolds itself as the traveler climbs to the Peak.

South to Singapore the ship made its way. While there, Hadley made a trip to Jahore on the mainland. The boat curved northward from Singapore to Penang, and then across the Indian Ocean to Columbo on the Island of Ceylon. The little Island of Minakoi, lying at the southern end of India, was noted for its beauty.

Lights were seen at Aden in Arabia as the boat entered the Red Sea, but it did not stop there. Two days and a fraction found them at the entrance of the Suez Canal. The heat was terrific in the engine rooms here. But the searchlights on other ships which they met in the canal, droves of camels, Bedouin camps and other strange scenes compensated for this discomfort.

Arguments with world-famed "bumboatmen" at Port Said added spice to the trip. Here many passengers left the boat for Cairo to be picked up a few days later in

(Contiuned On Page Three)

ENCOURAGING REPORTS FROM S. F. MINE EXCHANGE

The following is an official statement on the Idaho-Maryland Mine taken from the San Francisco Mining Exchange of recent date:

Idaho-Maryland Consolidated Mines, Inc., was organized under laws of Nevada in 1925 with an authorized capitalization of 2,500,000 common and 500,000 preferred shares, both classes of stock with a par value of $1 and both non-assessable. Of the preferred. 220,966 shares have been issued. The executive office is located in the Hobart building in San Francisco, with the transfer agency at the same address. The annual meeting is held on the second Wewnesday in March.

The company's properties, situated in the Grass Valley section of the California Mother Lode, consist of the Idaho-Maryland and Union Hill mines, comprising 750 acres, the Morehouse mine of 11 acres and more than 90 per cent stock ownership of the Brunswick Consolidated Gold Mining Company, comprising 450 acres.

The history of the property dates from the discovery of the Eureka-Idaho-Maryland oreshoot in 1860. From 1863 to 1893 this shoot produced approximately $18,000,000 in gold. A few years later the mine was closed on account of litigation.

Under the present management the new ore bodies have been developed and the mine has been brought back into profitable production. It now ranks among the leading gold producers of California. Net production in 1930 after bullion and smelter charges, was $234,752. During the first ten months of 1931, with two mills operating, gross recovery amounted to $574,573.33, or at the rate of $12.77 a ton, while the net operating profit for this period was $240,010.33, as compared with a slight loss in the previous year.

The plans are materializing for a substantial increase in production for 1932, with the installation of a ball mill which is scheduled to be in operation in a very short time. The milling plants have been equipped with the flotation method of extraction which is expected to improve recoveries.

According to the last report to stockholders, dated December 1, 1931, all outstanding indebtedness of the company has been paid and sufficient profit is being made to retire in the very near future all preferred stock now outstanding.

Accrued dividends on preferred shares outstanding prior to 1929 have been paid and the balance will be paid within the next few months With the retirement of the preferred shares profits will be available for dividends on the common shares.

Idaho-Maryland, which is listed on the San Francisco Mining Exchange, enjoyed a steady advance in price during 1931. The low for the year was 30 cents (January) and the high $1.50 (November and December.) Sales last Saturday were at $1.42.

Persistent rumors prevail that various tracts of potentially valuable mineral ground in the vicinity are soon to be trasferred, presumably to th eIdaho-Maryland group. They include Loma Rica orchard tract, the Mitchell ranch, the Washington claims and others.

0

ELKS INITIATE CLASS AT COLFAX WEDNESDAY

A large delegation of Elks of Nevada City Lodge, No. 518, B. P. O. E., traveled over the narrow gauge railroad to Colfax Wednesday evening where they initiated a class of candidates for the Grass Valley Lodge.

It was a regular meeting of the Grass Valley Lodge and the initiatory degree was put on by the Nevada City Lodge.

Grass Valley members joined the members on the trip to Colfax. Most of the members at Colfax are members of Grass Valley Lodge. They had made extensive plans for the entertainment of the visitors and a social session was enjoyed after adjournment of lodge.

0

Judge W. L. Mobley has returned from San Francisco much improved in health.

EMPRESS MINING CO MAKES GOOD RECORD

At the Chamber of Commerce rooms in the Elks Building in Nevada City is to be found a piece of gold bearing quartz that weighs about 150 pounds that was taken from the ledge in the lower workings of the Empress Mine at Newtown, west of Nevada City. It is a beautiful specimen and heavily mineralized.

The mine is over 400 feet deep at present with a station cut at the 400 level.

A standard headframe has been erected, electrical hoist equipment with 300 horse power installed, two modern air compressors placed in operation with the result that the Newtown mine now presents one of the most modern and compact surface plants of the district. Reduction of ore will be made by dumping the ore directly into the rock-breakers and from there to a stamp battery and on to a ball mill. Recovery process will include flotation cells. The mill was put into operation last Wednesday, it is reported.

The double compartment shaft was sunk 200 feet on a ledge of ore ranging from 5 to 15 feet in width which is carrying excellent gold values. The ore brought up in sinking operations has been placed on the dump and will be milled. Stoping will start as soon as the station is completed on the 400 level.

A water supply for the mine has been assured by a series of tanks which have been built for storage of water pumped from the workings.

The property is composed of 450 acres of excellent mineral ground.

Mr. Ed Jacobs opened this property about six months ago and has made rapid development of the mine. He has proven that he thoroughly understands mining and has gone about opening up the property in a most businesslike way.

About 30 men have been employed for some time at the mine in its development.

0

MASONIC LODGE, F. & A. M BUY SITE TO BUILD

Madison Lodge, F. & A. M., of Grass Valley last Friday night announced purchase of an 86 frontage on Auburn Street, at Bank Street, as the site for the new Masonic Temple, which has been projected for the last two years. Three separate parcels of land were purchased to get the desired frontage, Mrs. G. W. Starr, C. E. Clinch and Dr. Carl P. Jones being the seller. A Chinese Grocery Store on the corner of Auburn and Bank will be razed, as will several other smaller buildings.

At this time plans for the temple are still incomplete, with both plans and methods of financing being indefinite.

0

PAST PRESIDENTS OF N D G W NAME OFFICERS

The Nevada City-Grass Valley Association of Past Presidents of the N. D. G. W. Association No. 6, met Friday night and installed the following officers:

Margaret Nolan, President; Mary Richards, Past President; Adele Tredinnick, First Vice President; Beatrice George, Second Vice President; Adeline O'Connor, Third Vice President; Jennie Shearer, Inside Sentinel; Ethel Foote, Outside Sentinel; Beatrice Watters, Marshall; Lenore Steger, Financial Secretary; Edna Sampson, Treasurer; Vera Hansen, Recording Secretary; Aatha Locklin, Pianist; Annie Conlin, Junior Past President.

A social session was held and delightful refreshments served at the conclusion of the installation ceremonies.

0

LEGION HALL, GRASS VALLEY SOON TO BE COMPLETED

The new Legion Hall in Grass Valley is fast nearing completion and will add much to the looks of the city. It is of concrete and attractive in appearance.

0

Clyde Cole of Washington was a Tuesday visitor in Nevada City.

FAMOUS MURCHIE MINE IS RICH PRODUCER

The Murchie Mine has emerged within four years from a prospect of doubtful merit, sold by Nevada County for taxes, into a mine producing $80,000 to $100,000 a month and earning a substantial profit while paying for new equipment and extensive development work. The 20-stamp mill has been operating with two shifts and milling 160 tons of ore daily and producing 40 tons a week of high grade concentrate of a minimum value of $500 a ton it is said.

Reopening of the mine after some 20 years of inactivity was accomplished by two promoters, J. M. Hoff and V. V. Price. The property was transferred to the American Foundation Co., and was largely financed by M. C. C. Van Loben Sels, a wealthy agriculturist with extensive land holdings in the delta of the Sacramento river. Van Loben Sels moved to Nevada City to give his personal attention to the project. Success of the project is largely due to O. McCraney, general manager, who left the Argonaut Mine to take charge of the Murchie.

W. A. Kervin, former manager of the Mason Valley Mines Co., a Newmont subsidiary, who was the first manager of the Empire-Star Mines, Ltd., is said to be slated as manager of the Murchie Mine. Kervin left Grass Valley in the fall of 1929 to take over the management of the South African Copper Co., Ltd., another Newmont subsidiary, at O'Okiep, Namaqualand, South Africa. The South African mine was closed down several months ago when the copper market became unstable.

It is considered probable that development of the Murchie mine on the 1300-foot level will be expanded under the new management.

Mine machinery is operated by electricity, the mill by water power.

The ore at the Murchie Mine contains about three ounces of silver to one of gold and the quartz carries some galena and chalcopyrite. Development at the 1300-foot level has opened up two ore bodies.

0

MANY CALLS COME FOR CALIF. MINING JOURNAL

The California Mining Journal which is edited by Mrs. Elsie P. Willoughby, is taking well with the mining fraternity. There were more calls than the office could fill of one issue and reprints had to be made.

In Tuesday's mail copies of the Journal were sent to the Isle of Cypress, Greece; Switzerland; Count de Tristan, Paris France; Lima, Peru, and Columbia, South America; while several copies were sent to Ontario, Canada.

0

NEV. CITY-GRASS VALLEY SKI COURSE IS POPULAR

Last Sunday was an ideal day for snow sports at the Nevada City-Grass Valley Ski Club course nine miles above Nevada City on the Tahoe Ukiah highway. A large crowd was present from Nevada City, the valley sections and as far away as the bay region, for one of the best days of the season.

President Leiter plans to have the snow scraped off the highway and parking space at the course next Sunday as it required chains for most cars to reach the course.

Captain Joe Blake, and Officers W. C. Fouyer and George Hammill kept traffic moving and supervised parking of machines along the highway.

With more snow falling this week it looks as if there will be many more days of snow sports before the season ends.

0

NID FLUME DAMAGED BY SNOW

A repair crew of men sent out from N. I. D. headquarters have been engaged for several days repairing breaks in the 15 mile flume connecting Bowman Dam with Lake Spaulding, caused by snow slides, is reported as making favorable progress.

Snow in the Lake Bowman district is about 8 feet deep. Snow shoes are the only means of travel above Graniteville so deep is the snow.

SIERRA MINING SYND. READY TO HYDRAULIC

The Sierra Mining Syndicate above Quaker Hill has a crew of men who are running powder drifts into a 52 foot bank of earth, gravel and large boulders that have to be shaken up for hydraulicking operations. They have run one drift and blasted it early last week and were loading another drift with 52 cans of black powder and 12 boxes of giant powder, the latter being placed near the opening, and this will be set off with caps and fuse. The last drift was not as large as the first and was according to reports a Tee. When this blast is set off the company will be ready for hydraulicking. These drifts are customary in all drifts mines where solid banks are encountered. The Van Geisen dam is to be used for retaining the debris.

At present the snow ranges from about 2½ to 3½ feet at the property and they will have to wait for a rain or for warmer weather to thaw the snow.

Last season the Sierra Mining Syndicate erected four or five buildings and equipped them with modern furnishings. During the fall they constructed a ditch to carry water down to the works for hydraulicking. A telephone line will soon be run into the property.

About 12 men are employed at the property at the present time.

Mr. Dean Hayes is president of the company and Mr. William Deegan is superintendent.

0

METHODIST CHURCH GIVES BENEFIT MUSICALE

A fine Musical Program will be given on Thursday, February 4th at 8 P. M. for the benefit of the Methodist Episcopal Church under the direction of Miss Minnie Brand, Mrs. Catherine Celio, and Mr. Marshall Geiselman. The program will include numbers from out of town and local talent.

0

NEWS OF INTEREST FROM SIERRA CITY

Sierra City, Calif. (Special to The Nugget)—F. M. Doak of Rutherford and Messrs. Prescott and Isgig of Los Angeles spent several days at the Young America Mine last week. Mr. Isgig will return soon to make preparations for operating the mine. Jos. W. Thomas and his dog team accompanied the men out from the mine.

Henry G. Hubbard and Elmer N. Honn of Los Angeles arrived at the Bigelow Mine on the 25th.

During the cold weather everyone enjoyed the sleigh track between the Phoenix Mine and town.

0

ONE MINER KILLED TWO OTHERS INJURED

A "hung blast" or missed hole in the Golden Center Mine Thursday killed one victim and injured two others, and one so seriously that he may die. He lost one eye and may lose the other, and a large piece of rock went thru his side and punctured his lung.

Herbert Finch drilled into an old charge of powder shortly after 10 o'clock Thursday morning in the Golden Center mine, under the heart of the Grass Valley business district. A blinding road resulted. Finch was killed instantly. Lyle Folck, a companion was badly cut and torn and William Griggs, the third man of the party, was less seriously hurt.

The two injured men were taken to the Jones Memorial Hospital.

The mine is operated by Cooley Butler interests and is one of the best known in the district.

The explosion occurred in the old workings and miners say that the "hung" blast may have been there for 25 years or more.

Finch is a newcomer in Grass Valley.

0

Supervisor Dick Eddy sent his road crew to the Quaker Hill dist. last week to open the road and bring out the P. G. & E and Sierra Mining Synd. trucks which were stalled in the snow.

MUCH OF INTEREST AT LOCAL C. OF C.

Many of our local people are overlooking a chance of seeing many worthwhile objects in the Chamber of Commerce rooms at Nevada City.

As you enter the room you are attracted by an odd hand carved cabinet made by Post Master Scadden's father many years ago. It contains specimens of ore, old coins and mementoes.

In a case in the center of the room are to be found a splendid collection of nuts grown in Nevada County. To the left a case on the wall contains specimens of ore and one shelf of especially fine fossils of oysters, clams, petrified wood and the petrified vertebrae of some sea animal, all coming from the Steep Hollow district, in eastern Nevada County. This shows that this section was once a part of the ocean.

In the next case are beautiful sea shells, many fine ore specimens, and beautiful pieces of petrified wood, besides a number of relics of early timers that are of interest to all. In the back of the building are several helmets and gas attachments, besides several old fire arms. The late Judge Walling presented the C. of C. with an old army gun with bayonet attached used in the early Spanish and American Wars. There are also a sawed off shot gun used by messengers and several muzzle loading guns. In the same case there was an old hammer used by the famous Emma Nevada, who was born at Omega, Eastern Nevada County. There was also, a much worn snow shoe for a horse.

Mr. Woodman opened a drawer and showed the writer a fluting machine which ladies made ruffles and candle moulds of the long ago.

In another case was part of a mastadon's molar brought from Alaska and presented to the Chamber of Commerce by Mr. George Hothersall. Hanging in the back of the case are an old jail lock of 1856 that must weigh nearly a pound and a rusty old hand made mill key that came from Sutter's mill. There also is a pair of the oddest looking spectacles worn by the late City Marshal Spethen Vanard, who went out and single handed killed three robbers in Miner's Ravine west of Nevada City.

These are only a part of the exhibit and Mr. Griffiths, the secretary of the Chamber of Commerce, or Mr. Woodman are always most courteous in showing these interesting objects to visitors.

0

NEW MOVEMENT BEGUN TO AID CALIF MINE INDUSTRY

California civic and official agencies have begun a movement to eliminate shackles which are retarding the state's mining industry. Under the initiative of the state chamber of commerce and Walter W. Bradley, state mineralogist, formulation of a standard code of mine safety practices is under way and it is confidently expected the mining industry will adopt the regulations.

The mineral committee of the California State Chamber of Commerce ,headed by Dean Probert of the University of California, College of Mines, feels assured that once a standard code is in operation, there will result a material reduction in compensation rates, the principal factor which so long and in manifold ways has hampered mineral development.

At its recent annual meeting held in Los Angeles the state chamber of commerce adopted the committee's proposal that immediate efforts be made to reduce the basic rate of miner's compensation insurance, now stated by Mr. Bradley to be $10.54 per $100 of payroll in California, an amount greatly in excess of that prevailing in other states.

The mining committee has found that despite the present handicap, more than 100 mining properties have been opened or newly developed during the present year, these activities involving an expenditure of approximately $10,000,000 and giving employment to more than 7,500 men.

Mr. Bradley is authority for the statement that the highest compensation insurance rates in other states range from $5 to $7, and that certain of the larger mining com-

CAMPTONVILLE NEWS NOTES

CAMPTONVILLE, Jan. 26— The funeral of the late F. S. Labadie was held last Friday, the 23rd, from the Dobbins Catholic church with a requiem mass celebrated by the Rev. Father Hynes, interment being made in the Dobbins cedemtery, the Yuban pioner being laid to rest in the vicinity where he spent the better part of his life.

Fred B. Hanson, local resident, had the misfortune a few days ago of smashing off the end of the middle finger on his right hand, causing a very painful injury.

Fred Woolley returned Saturday from a visit with his parents at Clipper Mills.

Marion F. Lusk and wife of Downieville pased thru town Thursday enroute to Sacramento.

Clarence Deal and C. Penburthy of Forest City were in town Thursd .

Miss Lucille Fogarty of Downieville passed thru town Friday en-ro te to the lower country.

Sheriff W. D. Johnson of Downieville and Deputy H. Staek passed th u town enroute to Challenge.

Henry Schofield and wife motored to Downieville Sunday.

Mrs. Eugene Hays celebrated her birthday Sunday with a diner and a number of relatives present.

Mrs. Olive Groves and son and Henry Van Lenep of Auburn spent the wek end visiting relatives here

Mrs. M. R. Carlson was taken to the Nevada City aSnitarium a few days ago suffering with la grippe.

J. L. Joubert and C. L. Wlison Jr. arrived Friday from Sacramento to visit relatives over the week end.

Mrs. Maragret Goldthwait celebrated a birthday Monday.

Fred Joubert motored to Grass Valley Friday on business.

Erle Pauly and Ray Knickrem motored to Sacramento Sunday.

Mr. and Mrs. L. L. Bishop and daughter of Oak Valley spent the week end in town.

Mrs. J. E. Pauly and sons returned from a two weeks visit in Oakland.

Mrs. Rachel Labadie, Miss Lola Labadie, Mrs. Acton M. Cleveland, Mrs. Margaret Goldthwait and Geo. Langley motored to Dobbins Friday to attend the funeral of the late F. S. Labadie.

GENERAL DESCRIPTION OF RADIUM ORE

Mr. C. D. Wickes of the Salmon Mine brought a sample of urainite ore to The Nugget office a few days ago. It carries 2% urainian oxide from which redium is extracted. The ore was taken from the Shoemaker Mountains of south eastern Oregon.

The following is an article on the general description of radium ore:

"Radium is a brilliant white metal that melts sharply at about 700°C. and volatilizes appreciably at that temperature. With an estimated specific gravity of nearly 6.0, it is more than twice as heavy as aluminum and 25 per cent lighter than iron. Although it has been isolated in its metallic state, it is not used in that form, partly because it tarnishes rapidly even in dry air (forming a nitride), partly because of the greater expense of reducing it to metal, and partly because of the difficulty of dealing with such minute quantities of material. It is used always in the form of its compounds, the most important of which form the viewpoint of utilization are the bromide, chloride, and sulphate.

Radium compounds are similar in many ways to those of the alkaline-earth metals. With barium, in fact, it forms isomorphous salts which can be separated only by virtue of their difference in solubility. The physical and chemical properties of the compounds of the alkali and alkali-earth metals usually show a well-marked gradation in the order calcium, lithium, strontium, barium, sodium, potassium, rubidium, and caesium; and in this scheme radium comes between barium and sodium. In so far as the volatility of the element is concerned, however, radium resembles calcium rather than barium.

The outstanding property of radium is its redioactivity, which it imparts also to its salts. Radium metal decomposes water vigorously, evolving hydrogen and forming hydroxide in solution. The chloride, bromide, nitrate, carbonate, sluphate, azoimide, and platino cyanide of radium are known. When freshly prepared all of these are colorless, but they develop color on standing. Radium chloride closely resembles barium chlodire. It is a soluable, while crystalline salt, paramagnetic, and hygroscopic. The bromide is an unstable substance, losing bromide when kept, and passing into the hydroxide. It is a white crystalline salt, containing, when pure, 53.6 per cent of the element. Radium sulphate is the least soluble of all the sulphates.

Radium appears on the market usually in the form of anhydrous bromide mixed with more or less barium bromide and packed in small sealed glass tubes. If freshly sealed, both the glass and contents are colorless or nearly so, but after some time the tubes are likely to become a deep violet color and the salt is likely to turn to a brownish tinge. Especially in freshly prepared tubes the salt may be luminous in the dark, but this is due to the presence of minor impurities, as neither radium not its compounds are luminous. The glass tubes are usually encased in lead as a protection to those that must handle them."

Radium is used in treatment of cancer, in illuminating paint for watch and clock dials, electric switch buttons and keyholes.

WHAT IS THE CAUSE OF YOUR COUGH

Many people do not realize that coughing is the efforts to loosen phlegm from the infected spot in order that it may heal.

That is the function of Rexall Cherry Bark Cough Syrup. It loosens the hard, dry phlegm—soothes the tickling and heals the inflamed tissues. In a very short while your cough has entirely disappeared. Get a bottle at the Rexall Store today. You will like its pleasant taste.

11TH HEALTH ARTICLE BY CRONWELL

Dr. B. G. Cronwell,

Article eleven of a series of health articles written by Dr. B. G. Cronwell, chiropractor and food scientist, formerly of San Francisco, now of Nevada City, California.

Last week we were dealing with aluminum poisoning and the proper way to steep tea and the use of tea and coffee in moderation. The next greatest step in line with our health program will take into consideration, the preparing and mixing of certain foods. First have an understanding with your self that your sense of taste is not the most important of your sense organs and that we should eat to live and not live to eat like ninety percent of the present day. It is not so bad to be considered a big eater if you are thoroughly educated on the selection of pure foods. If you are led to buy all the preparations that big concerns want to sell not because of their worth, but in order to add to their personal wealth. All prepared foods in order that they will keep indefinitely must be thoroughly cooked that means that every speck of food value has been destroyed. It takes live food to build a live body. Dead foods are just that much wear and tear on the digestive system, trying to remove load after load of trash. To sterilize any thing all we need do is boil for a few minutes, then what happens to any article of food which has been subjected to twenty to forty minutes of constant boiling. Now you can see why we have such an increase in cancer and so many other so called diseases to-day. Ever since the birth of our public school system all the text books and teachings which have been permitted have been to mystify the public to the simple function of every organ in the body. When that deplorable situation is corrected, children will know how to care for their bodies. Remember your soul only remains in the body as long as it is a fit place to live. If the fourth grade in grammar school could have one of the main subjects the simple understanding of the body as it really is, then every child that passed through this grade would have a better understanding of their body as the fourteen year old boy has of a Ford car which he is allowed to ve and do as he pleases with for one year. You show that boy any little part of that kind of a car and he will tell you what it is and what it is for quicker than you can ask the question and if you think it is for a purpose which he knows better it will not take long for him to thoroughly explain it to you. Do you think if all our boys and girls had the same understanding of their bodies that they would smoke, drink or misuse themselves, more, or less than they do to-day?

The Public School Protective Association are doing all they can to change some of these text books and wrong teachings. I like their slogan, "The public school is to educate, not to medicate." It is the school which is public not the child.

I do not believe that one parent out of every hundred knows anything about or that the Public School Productive Association even exists, where as it is they are the ones who hold the whip over our present day school system, if it was not for the consistent work of this organization we would still have compulsory vaccination in our schools. This was done away with in 1921 and still school nurses influence a good many parents to have their children shot full of cow pus. Every parent having children in school should contribute at least five dollars a year to the Public School Protective Association who are so faithfully watching every school movement of to-day. What can you do alone to correct the school system that your child is forced to attend. At the present time a student can not enter the colleges of California without being vaccinated. This is keeping a good many away from college as after raising a child without subjecting to vaccines they refuse to have anything shot into their child at this age. They know that vaccination is merely blood assination. The matter of vaccination is an entry to the State Colleges will be fought out in the courts very shortly and right will prevail.

It pleases me very much, the interest you are taking in these health articles. Your questions are good and help others who would like to know more about retaining then health. I wish you would try to send your questions early. Why not make it a rule to sit down right after breakfast Monday mornings and write down your question and send it in that day. You need not even waste a stamp, you may place your question in an envelope addressed to me and leave it at The Nugget office as you are passing that way. If I get a great many more questions than space will permit me to answer, I will answer by letter direct to you with out any expense to you.

Address me Box 165 Nevada City or care of The Nugget office.

Question—What makes a person bite their finger nails? Mrs. C.

Mrs. C—Most children we find biting their nails have worms, or some other condition which brings about a state of nervousness. A change in diet will be the best step to take first.

Question—Why is there so much sickness in the early spring? Mrs. L.

Mrs. L.—Nice weather, long days more sunshine and more out door living brings about a state of health and that means you must go through a state of elimination which is not pleasant therefore you are not at ease, (disease).

Question—What can be done for fallen arches and tired swollen feet? Mrs. S.

Mrs. S.—Poor fitting shoes, high heels, distortions of the lower part of the spine and last but not least, wrong foods which bring about a gouty condition and a breaking down of the muscle tissue of the feet. Have your spine corrected and change your diet and do not wear arch supports which will only make matters worse.

GORDON HADLEY TELLS OF HIS WORLD TOUR

(Continued From Page One)

Alexandria. The weather became colder after entering the Mediterranean.

The ship stopped for a short time at Napoli, and again at Genoa. Hadley spent a large part of one day visiting the Campo Santo, the huge urial ground, with its innummerable statues, and then received an added thrill in viewing the old stone house in which Christopher Columbus was born. Another stop in the great port of Marseilles, France, and they were off across the Atlantic to Boston. The ship arrived at Boston only a short time after the Stanford-Dartmouth game wa sover. Had the ship arrived on time, the Arcatan would have been an interested spectator at the game.

The remainder of the trip took Hadley down to New York, on to Havana, through the Canal and back to San Francisco again. Mrs. Hadley and her son, Canning, met the globe circler and several days were pleasantly spent in visiting relatives."

Mrs. Hadley is a musician of note She is the daughter of Mrs. Clara Scarfe of Nevada City.

MRS. SARAH ERWAY BURIED THURSDAY

Mrs. Sarah Erway, wife of George Erway of Nevada City, passed away Tuesday morning at the Jones Memorial Hospital in Grass Valley. She had been ill about seven months and bore her suffering with great fortitude and uncomplainingly.

Mrs. Erway was born in Tennessee 54 years ago. The family came to this county 30 years ago and have lived in Nevada City for some time.

She was highly esteemed by all who knew her, her death coming as a shock to her many friends. She was a loving wife and mother and will be sadly missed by her family.

Surviving are her husband, G. W. Erway, and the following sons and daughters, James and Charles Erway of Nevada City, Mrs. Anna Larson and Mrs. A. J. Nielsen of San Francisco, and Misses Emma and Loraine Erway of Nevada City. Mrs. J. F. Smith of Vallejo is a sister and she has one grandson, James Nankervis of Nevada City.

Burial took place Thursday afternoon. Rev. H. H. Buckner officiated Holmes Funeral Home had charge of funeral arrangements.

WEISENBERGER FUNERAL WAS HELD TUESDAY

The body of the late C. C. Weisenberger was shipped from Watsonville Monday and arrived in Nevada City Tuesday. Burial took place in Pine Grove cemetery and the services were largely attended by friends in this city. Holmes Funeral Home had charge of arrangements and Nevada City Lodge No. 13, F. & A. M. conducted commitment services.

A sister, Mrs. Mary Calkins and two brothers, Ed and Henry Weisenberger, and other relatives came up to attend the funeral.

Mr. Weisenbergen was a former prominent resident of Nevada City.

—0—

MRS. SALLIE PRESCOTT AT LIFE'S END

The death of Mrs. Sallie M. Prescott in San Francisco a few days ago came as a great shock to her friends in Nevada City. She had resided in this city for a long number of years and her friends are sorry to learn of her shdden passing.

Death was due to influenza and she had been ill only a few days.

Surviving her are her husband, George H. Prescott, two sons, George H. Jr., and Percival Mills, and a sister, Mrs. Alexina Grissel.

Burial took place in San Francisco Monday.

—0—

AGED RECLUSE FOUND DEAD IN LONELY CABIN

The body of G. Fontoni was found in his lonely cabin near the Five Mile House near the Tahoe Ukiah highway east of Nevada City. this week.

John Maxfield, a neighbor, noted that Fontoni had not been about for several days, and he went to the cabin to investigate. Finding the door locked he sent for friends of the man in Nevada Ciy, ad they came and forced an entrance and found him lying dead in bed. Apparently he had been dead about two days.

Coroner A. M. Holmes was notified and with the assistance of several men the body was placed on a toboggan and drawn over the snow to the highway, where it was placed in an ambulance and brought to Nevada City.

He was a native of Italy, aged about 78 years, and was of a kindly inoffensive disposition, being well liked by all who knew him.

—0—

PIONEER CHINESE OF NEVADA CITY PASSES

Word has been received in Nevada City of the death in San Francisco of an old Chinese known here as Ed Long.

For more than 25 years he has been a messenger in the Nevada City post office, delivering special delivery letters. He was perhaps the only alien in the government postal service. Recently he was presented with No. 1 U. S. Special Delivery badge, which he proudly wore on his cap. He was so pleased with his cap he only wore it in good weather, wearing an old hat or cap on stormy days.

Not long ago he complained of being ill and told Post Master Scadden he was going to a hospital in San Francisco for treatment.

During all his long faithful service in the post office he has picked up many, many pieces of jewelry, checks, purses, coins, and other valuables lost by those coming and going and has carefully turned these over to the post office employees and they in turn returned them to their rightful owners.

He was 80 years old and has resided in Nevada City more than 60 years. Ed as he was familiarly known always touched his hat or cap to ladies and had a pleasant word for everyone.

TAHOE SKI TOURNAMENT DRAWS MANY TOURISTS

California will be host to thousands of visitors on February 26, 27, and 28 when the national ski tournament is held on Tahoe Hill, Tahoe City, it was annouced by Senator Bert A. Cassidy of Auburn director of the tournament for the National Ski Association of America.

It is expected that the most, is the first one of its kind ever held west of the Rockies, will bring between 10,000 and 15,000 visitors to the lake district. The tournament is expected to be especially attractive to west coast states where skiing has developed rapidly during the the last few yearsand scores of clubs for skiers have been formed.

Officials for the event will be selected from Oregon, Colorado and California with Governor James Rolph Jr., already assigned as official starter. Governor F. B. Balzar of Nevada, who acted as an official at the recent Utah winter sports contests, and a personal friend of Governor Rolph, is also expected to be present one of the three days during the national meet.

New records are expected to fall during the meet in many of the events but partically in the ski-jump where ideal weather conditions have been aided by the hand of man to provide all that could be desired.

A record snow fall of between 10 to 15 feet has fallen in the Tahoe district, officals of the Tahoe Area Council report. This is said to be ideal for the ski-jump as well as the cross-country ski races.

scaffold in the country has been erected atop a large hill in the lake area. Below it is a small slope which gives way to a large hill on the slope of which the ski-riders are expected to land.

Jumpers, who shove off from the peake of the scaffolding come hurtling down from the slide at a speed of between 60 and 80 miles an hour and go salling out into space, flapping their arms like wings as they soar over 100 feet before dropping down to the snow-slad slope.

The small hill below the scaffolding makes it necesary for all ski-riders to sail at least 100 feet before landing. One jumper has made 230 feet this year and it is expected that the records of the meet will show several landing between 200 and 250 feet from their takeoff marks.
